

# How Much is your Case Worth?

**CaseWORTH** is a comprehensive and innovative new legal software application. It helps you efficiently and expertly manage the enormous quantity of financial information for personal injury, medical malpractice, social security, and worker's compensation cases. Organize and track medical bills, medical records, insurance payments, and personal expenses such as lost income and potential future earnings with CaseWORTH.

One of the greatest and most time-consuming challenges you face as a personal injury attorney or paralegal is collecting and managing the financial details of a case and building a usable work product from that detail. CaseWORTH automatically manages all of the financial details for you in one place. CaseWORTH allows you to attach the supporting facts and documentation directly to this financial history. As you discuss the money spent or lost on each date, the facts and answers to the opposing party's questions are visible directly from each financial entry.

CaseWORTH's Settlement Calculator and valuable reports allow attorneys to analyze the case potential and negotiate the best possible settlement for the client. CaseWORTH automatically generates a Medical Treatment Chronology report, and even prints a Settlement Statement ready for the client to sign. When updated case information is entered, it is immediately reflected in all summaries and reports.

## CaseWORTH Feature Highlights

- Track medical expenses, records, bills, medical liens, subrogation payments, and costs of collection, and other damages and expenses
- Document your negotiations with insurance companies and medical providers that are made on your client's behalf
- Substantiate and calculate future lost income and future medical expenses, reducing them to present value without hiring an economist
- Constantly re-assess your client's and firm's financial position as expenses roll in and as settlement demands and offers are made

With CaseWORTH, building concrete documentation is just one click away.

Put the latest technology to work for you in successfully managing your litigation matters. Secure the necessary funds to take care of your client during difficult times.
